

Leafy Lane Hedgehog Highway

Do you want to help our local hedgehogs?

A community project for local people to link gardens in Rudloe and surrounding areas to create a wider habitat for hedgehogs.

One of the main reasons hedgehogs are struggling in the UK is because our fences and walls reduce the amount of land available to them.

We can give them a helping hand by creating holes or gaps for them to pass through.

The Leafy Lane Hedgehog Highway project encourages and coordinates local residents to remove barriers that prevent hedgehogs from travelling up to a mile every night in their quest to find food and a mate.

Find out more and pledge to
create a hedgehog hole...
